

ACO. creating
the future of drainage

PORTFOLIO

AT&T Stadium/Dallas Cowboys Stadium Arlington, TX

AT&T Stadium, formerly Cowboys Stadium, is a multi-media entertainment stadium in Arlington, Texas. It serves as the home of the Dallas Cowboys of the National Football League. The facility is also used for other activities such as concerts, basketball games, soccer, college and high school football contests, rodeos, motocross, and Spartan races.

Project Design Brief

KlassikDrain KS100 with stainless steel perforated grates were used to keep the entrance, exits, and exterior walkways of the stadium clear of water and any spills. It was important the grates appear aesthetically pleasing and in cohesion with the stadium's appearance without sacrificing any water intake.

Benefits

- The stainless steel, perforated trench drain grates compliment the stadium's design and are ADA compliant, and heel safe for total pedestrian safety.
