

ACO. creating
the future of drainage

PORTFOLIO

Mount Timpanogos Utah Temple American Fork, Utah

ACO used a standard layout of StormBrixx® for Mount Timpanogos Utah Temple located in American Fork, Utah. The temple is the 49th operating temple of The Church of Jesus Christ of Latter-day Saints.

Project Design Brief

Mount Timpanogos Utah Temple wanted to replace their old French drain system with something that could stop the water from pooling in the parking lot and on the landscape causing the beautiful temple to look unkempt and unsafe. The ACO StormBrixx® SD system is fully traffic rated for HS20 and the column design allows for loads to be absorbed easily while being trafficked by vehicles. Three layers of the ACO StormBrixx® SD were installed within the limited footprint.

Benefits

- Due to StormBrixx® SD providing a 97% void ratio, that allowed for a taller, deeper system without going wider.
- StormBrixx® SD allows for easy access and maintenance from the groundskeeper.
