COVER CHART

NOTE 1: Minimum Cover Thickness in non-trafficked areas is based on landscape surface with a 40 degree load distribution. In trafficked areas, Minimum Cover Thicknesses are based on an asphalt-surfaced pavement with a 30 degree load distribution. NOTE 2: Calculations assume backfill with a minimum 32-degree angle of internal friction and a maximum density of 120 lbs per cubic foot, and a seasonal groundwater elevation at least 2 feet below the invert of the tank

SIDE PANEL PIPE **DIAMETER CHART**

Inlet/Outlet I	Inlet/Outlet Pipe Diameter				
Minimum	Maximum				
4 inches	6 inches				

NOTE 1: Cut inlet / outlet pipe hole prior to side panel installatio NOTE 2: Contact ACO for guidance for

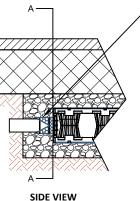

inlet / outlet pipes larger than 6-inch diameter
