## **STORMBRIXX STANDARD DETAILS 300SD SYSTEM - 2 LAYER - INFILTRATION**

be cut in half to accommodate the Remote Access Plate

**COVER CHART** 

Live Loading Condition	Cover Thickness (inches)		
Live Loading Condition	Minimum	Maximum	
Non-Trafficked Areas (i.e.	12	78	
Landscaping)	12		
Passenger Vehicles Parking Lot			
(i.e. Gross Vehicle Weight	18	78	
<10,000 lbs)			
Passenger Vehicle Parking Lot			
with one weekly AASHTO HS-20	24	78	
vehicle			
Frequent AASHTO HS-20 Traffic	26	78	

NOTE 1: Minimum Cover Thickness in non-trafficked areas is based on landscape surface with a 40 degree load distribution. In trafficked areas. Minimum Cover Thicknesses are based on an asphalt-surfaced pavement with a 30 degree load distribution. Apprinters in accel parentier with a 30 edge to load assistation. NOTE 2: Calculations assume backfill with a minimum 32-degree angle of internal friction and a maximum density of 120 lbs per cubic foot, and a seasonal groundwater elevation at least 2 feet below the invert of the tank.

## SIDE PANEL PIPE **DIAMETER CHART**

Inlet/Outlet Pipe Diameter				
Minimum	Maximum			
4 inches	6 inches			

NOTE 1: Cut inlet / outlet pipe hole prior to side panel installation.

NOTE 2: Contact ACO for guidance for inlet / outlet pipes larger than 6-inch diameter
